TO REDUCE SHORT-LIVED
CLIMATE POLLUTANTS

PRESS RELEASE

CCAC Holds Webinar on Green Freight

On January 22, 2014 the CCAC joined UNEP, Environment Canada and US EPA in hosting a webinar on green freight. Speakers from Canada, the US and the CCAC Secretariat introduced the CCAC's Green Freight Call to Action and action plan, the status of green freight efforts around the world, and the varied work of the CCAC and its heavy-duty diesel initiative.

The Green Freight steering group is looking for industry leaders and other stakeholders who are interested in playing a role in the development of the Green Freight Action Plan.

The Climate and Clean Air Coalition is a voluntary global partnership of governments, intergovernmental organizations, businesses, scientific institutions and civil society committed to catalyzing concrete, substantial action to reduce Short Lived Climate Pollutants (including methane, black carbon and many hydrofluorocarbons). The Coalition has [11 initiatives](#) working to raise awareness, mobilize resources and lead transformative actions in key emitting and cross cutting sectors. SLCP reduction must go hand in hand with deep and persistent cuts to carbon dioxide and other long-lived greenhouse gases if we are to stay under a 2 degrees Celsius warming limit.
